

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFATORY NOTE

The schedules for PN, PR and PS were originally prepared by Dr. Edwin Wiley, under the supervision of Mr. Charles Martel, then Chief Classifier. They are now printed, with revisions to date, for administrative purposes and for the convenience of libraries using the Library of Congress classification.

In the case of PR and PS, PR has been used for English writers in general, including those of the British colonies, PS being limited to the United States.

It is to be noted that the main purpose of this work is to furnish an aid to classification and not to give a complete list of authors represented in these classes of the Library's collection. The names of several well-known writers of recent fiction are omitted for the reason that their works are classified in PZ 3. On the other hand, names are cited in certain cases as illustrative of the method of using the class numbers rather than showing the importance of the authors.

The classification schedules for foreign literature are still in progress and will, it is expected, be issued in several sections, French, German, Italian, etc., as completed.

CLARENCE W. PERLEY,
Chief Classifier

HERBERT PUTNAM
Librarian of Congress
Washington, August 15, 1914

EXPLANATION OF REFERENCES TO TABLES

When schemes for a special author or work are not written out in full, the tables of subdivisions given at the end are to be applied as indicated by the Roman numerals in curves. Thus, PR 2350-2368 Spenser (III) indicates that the works are to be arranged as shown in Literature Table III; PR 2355-2360, a special adaptation of the table, is given in full in the schedules.
